General Surgical Instruments Catalogue

Proud to be a family-run Pakistani company

info@bpesurgical.com

www.bpesurgical.com

Best Performance Enterprises was established 2005 as a consulting and service organization. Our Founders have more than 60 years active experience in the medical field.

Our Products come from the leading surgical instrument manufactures located in the Medical Valley of Sialkot Pakistan. Sialkot is known as the "Surgical instrument capital of the World".

Best Performance Enterprises has a long tradition of working with manufactures and leading surgeons in close collaboration, consistently develop and refine better instruments. We combine both tradition and innovation in our pursuit of excellence.

Our products utilize the newest manufacturing methods and are built with the skilled hands and trained eyes of highly qualified craftsmen to produce instruments that exceed our quality standards. We are proud to state that our instruments are "Made in Pakistan".

To ensure the highest level of quality, our products are subject to a number of regulations such as ISO 9001 and CE certified. These standards are applied to all stages of the design, development and manufacturing process.

Our Goal is to Deliver superior surgical instruments as well as Professional and efficient repair solutions to our customers.

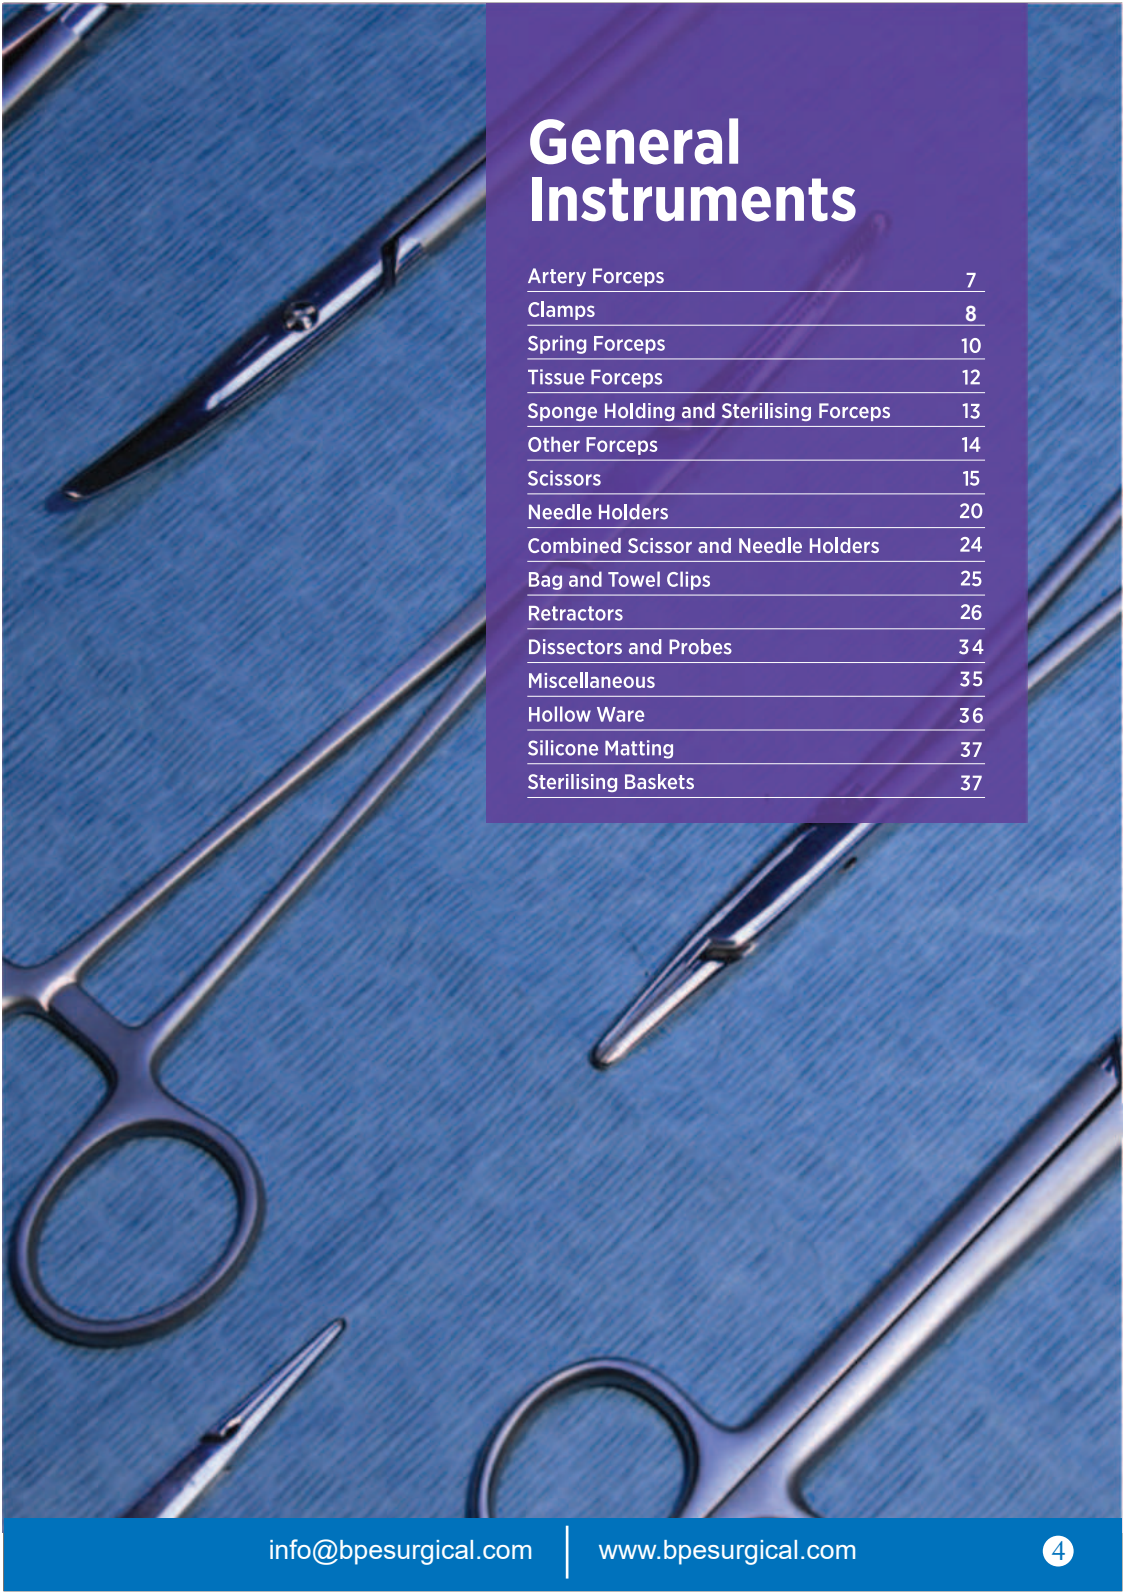

Best Performance Enterprises

OUR FOUNDER

C.E.O
Nadeem Khalid Mughal

Best Performance Enterprises was established in 2005 by Two brothers who carried forward the family tradition with a very long history and experience in the manufacturing of surgical instruments. The family business dates back to 1942 where our father Muhammad Sadiq started the manufacturing of surgical instruments.

An Overview On

Forcep Jaw Types

You will see that forceps in our catalogue will have either a traditional serrated jaw or a different design which is known as atraumatic (or non-traumatic).

Traditional Serrated Jaw

The traditional serrated jaw is generally more robust and used on forceps where the areas are not as delicate.

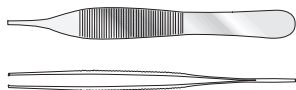

Atraumatic Jaw

Atraumatic jaws will be mainly found in delicate surgery areas such as vascular and cardiothoracic. The design is such, that the surface area gripped is reduced, ensuring less trauma without the loss of grip.

Spring Forceps

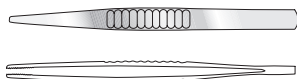

Adsons Dissecting Forceps

127mm long

Code	Description
BPE 257	1-2 teeth
BPE 258	Lightweight, micro
BPE 259	Serrated

Guide for Gold and Black Bows

It's important to know the difference for the intended use of each scissor:

2 Gold Bows
Tungsten carbide insert or padding for a scissor

2 Black Bows
Supercut edge

1 Black and 1 Gold Bow
Supercut tungsten carbide

1 Black Bow (left ring)
Left-handed instrument

Supercut Operating Scissors

BPE 213	178mm long

Choosing the most suitable needle size

Our tungsten carbide inserts are available in a variety of styles. Choosing the most suitable needle size for each procedure helps give the surgeon maximum grip and control.

Coarse 0.65mm

For powerful needle holder patterns and wire twisters. Maximum holding capabilities for heavy needles or wire.

Standard 0.5mm

Used, for example, in Mayo-Hegar, Mathieu Needle Holders. For needles 3-0 and larger.

Fine 0.4mm

For delicate needle holders such as Crile-Wood and DeBakey. For needles and sutures between 4-0 and 6-0.

Micro 0.2-0.3mm

For micro needle holders such as Castroviejo, Microvascular and Mini-Ryder. For delicate needles and sutures between 7-0 and 10-0.

Smooth

Smooth tungsten carbide surface reduces damage to delicate needles and suture of 6-0 and finer.

Tungsten Carbide Needle Holders

Features and Benefits

Jaw

Tungsten carbide inserts
bonded into the jaws for
a long lasting, secure grip

Bevelled Edges

Prevents suture from snagging

Laser Etching

Date and catalogue number
are etched for easy re-ordering.
Laser etch will not harm
instrument like traditional
methods

Satin Finish

Reduces glare

Ratchets

Precisely cut for effortless
locking/unlocking

Teeth

Fine, hard teeth, diamond
cut into an insert of hardened
tungsten carbide for superior
needle grasping and suture
tying capabilities

Vacuum Brazing

Combines bonding of the
tungsten carbide insert with
the simultaneous vacuum
hardening of the instrument
for greater durability and
longevity

Shanks

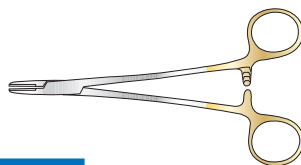

Precision balanced for
comfort and control

Gold Handles

For easy identification

Mayo-Hegar Needle Holder

Silicone Matting

Medical grade for storage, sterilisation and transportation of instruments.

Cushion, protect, and organise delicate surgical instruments during storage, transportation, and sterilisation. Perforations allow for ventilation during the sterilisation process. The silicone mat can be cut to fit any size container.

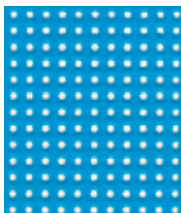

SILICONE MATTING AVAILABLE FOR ALL BASKETS - PLEASE ASK FOR PRICE
